

Species name: **Carlina onopordifolia**
Annex: **II, IV**

Species group: **Plants**
Regions: **CON**

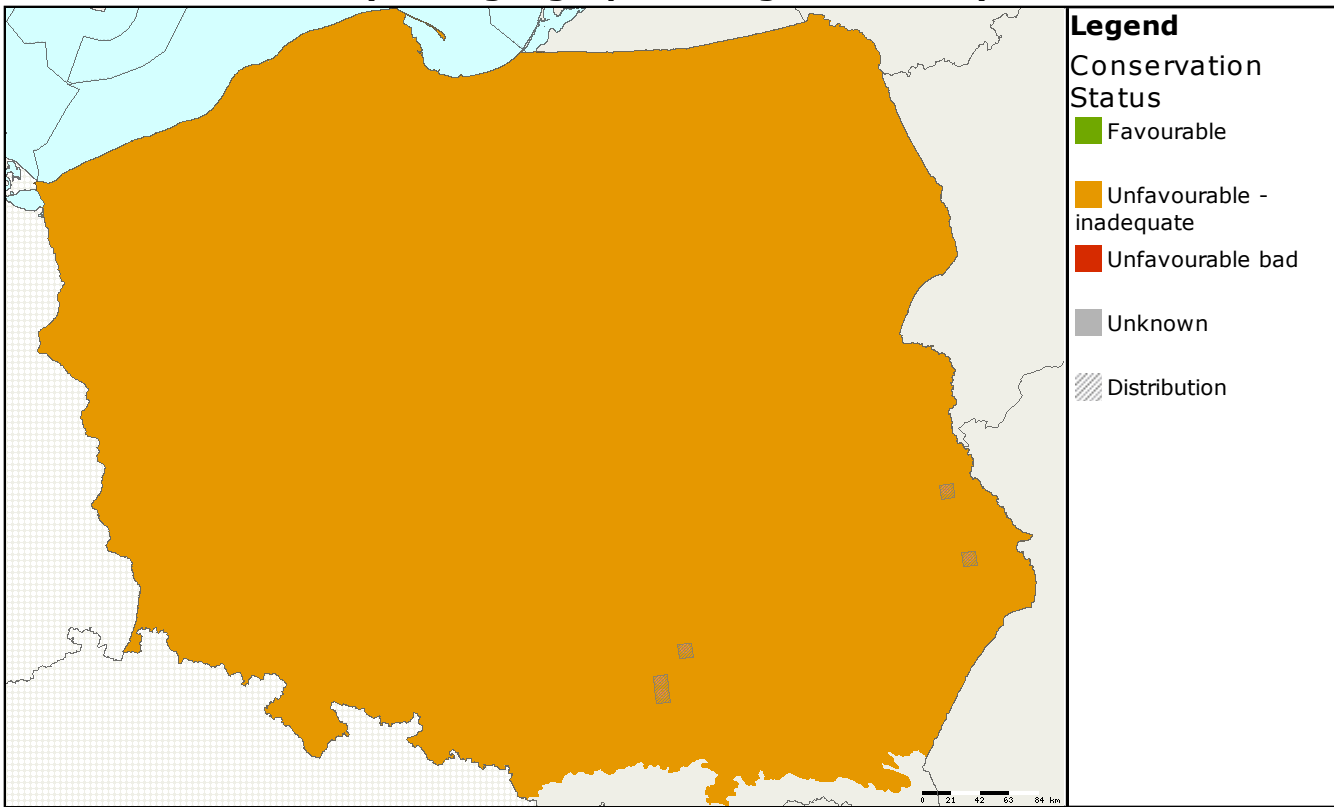

Assessments of conservation status at the European level (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	CON						19000 indiv.	+

CON: Only in PL Poor due to habitat, although population is increasing Polish NGOs suggest that both range and population are not favourable and that favourable reference values should reflect the historic distribution. Changing the assessment of these parameters to unfavourable-inadequate would not alter the overall assessment

**Assessments of conservation status as reported by Member states
(all biogeographical regions - EU25)**

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
PL	CON						19000 - 19000 indiv.	+	1

Data quality is based on an assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at <http://biodiversity.eionet.europa.eu/article17>
