

Species name: **Ophrys lunulata**  
Annex: **II\*, IV**

Species group: **Plants**  
Regions: **MED**

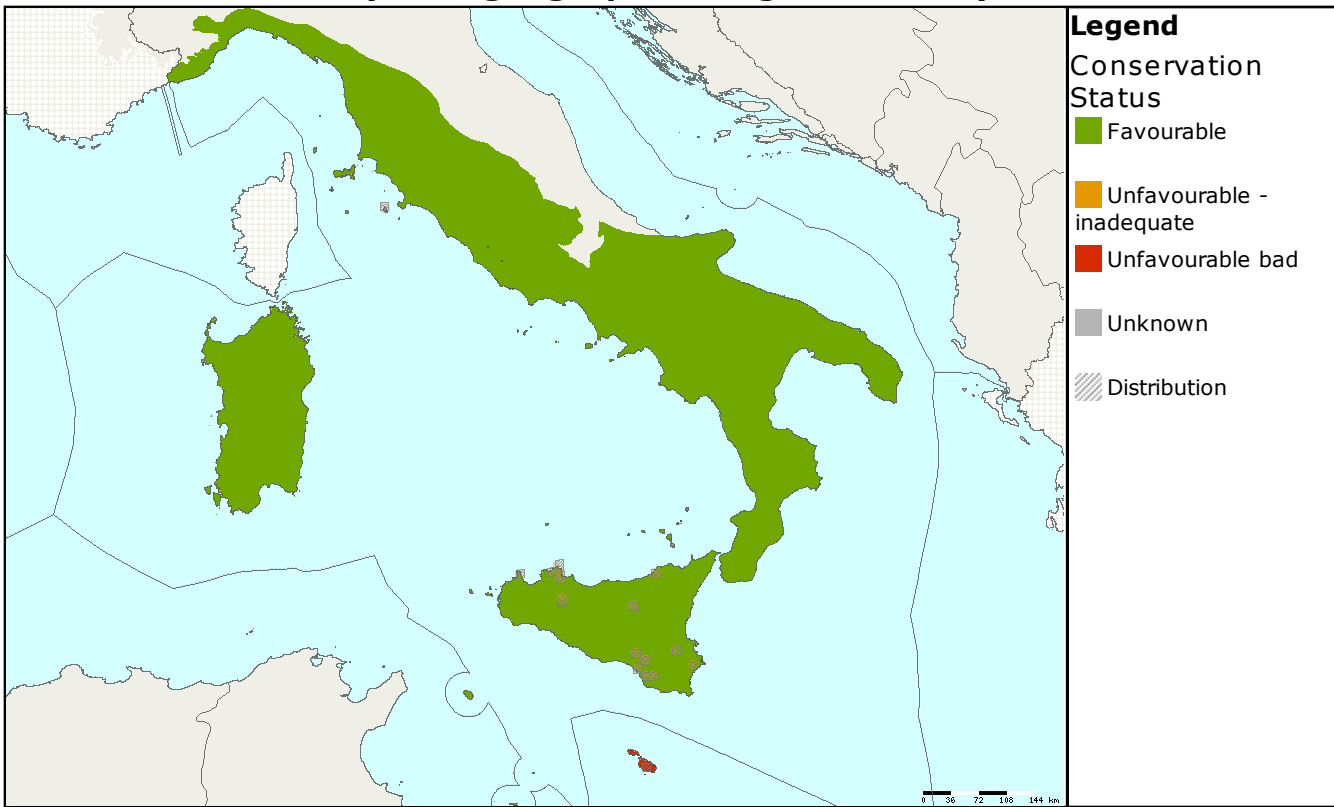

## Assessments of conservation status at the European level (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	MED						16 loc.	=

MED: Favourable overall assessment is derived from Italian report. The report of Malta with only one locality has minimal impact on the final result (only the current habitat is included).

**Assessments of conservation status as reported by Member states  
(all biogeographical regions - EU25)**

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
IT	MED	<span style="background-color: green; color: black;"> </span>	<span style="background-color: green; color: black;"> </span>	<span style="background-color: grey; color: black;"> </span>	<span style="background-color: green; color: black;"> </span>	<span style="background-color: green; color: black;"> </span>	16 - 16 loc.	=	2
MT	MED	MT has provided a report to the European Commission under Article 17							

Data quality is based on an assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at
