

Species name: **Persicaria foliosa**  
Annex: **II, IV**

Species group: **Plants**  
Regions: **BOR**

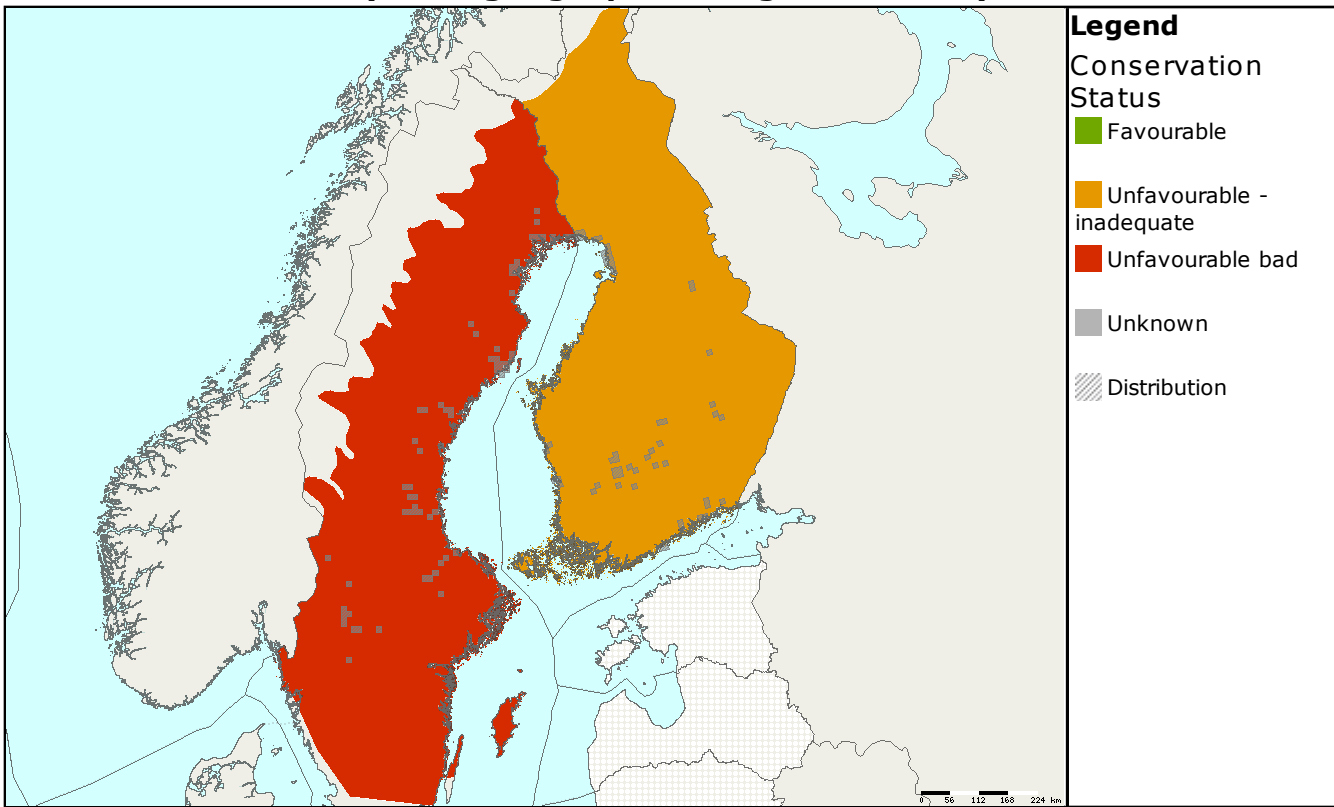

## Assessments of conservation status at the European level (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	BOR						368 grids	-

*Persicaria foliosa* is a plant that appears in Finland, Sweden and Norway. Its overall status of conservation is assessed as “unfavourable-bad” due to the Swedish report on range parameter. Changes in pastoral system and eutrophication are the main threats to the species.

## Assessments of conservation status as reported by Member states (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
FI	BOR						129 - (129) grids	-	2
SE	BOR						250000 - 250000 indiv.	=	2

Data quality is based on as assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at
