Species group: **Plants**
Regions: **MED**

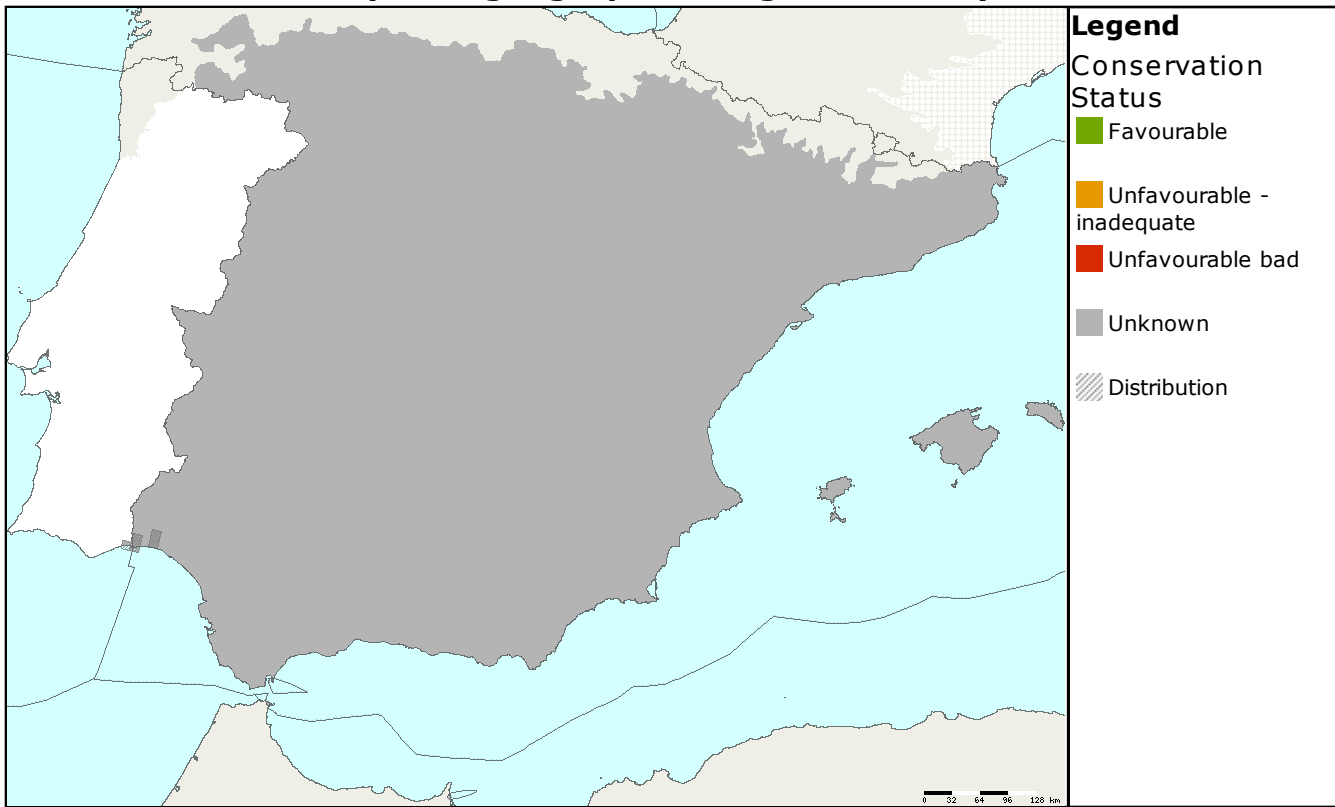

Assessments of conservation status at the European level (all biogeographical regions - EU25)

| MS | Region | Conservation status assessment | | | | | Population size & unit | Population Trend |
|------|--------|--------------------------------|------------|---------|------------------|---------|------------------------|------------------|
| | | Range | Population | Habitat | Future prospects | Overall | | |
| EU25 | MED | | | | | | 8 grids | - |

Picris willkommii is an endemic plant to a small Mediterranean coastal area between Spain and Portugal. The status of conservation for the species is "unknown" with all parameters reported as "unknown" by Spain and "not assessed" by Portugal. Better information is required for the species. The species is protected by Spanish legislation.

**Assessments of conservation status as reported by Member states
(all biogeographical regions - EU25)**

| MS | Region | Conservation status assessment | | | | | Size&unit | Population trend | Data quality |
|----|--------|--------------------------------|------------|---------|------------------|---------|------------------|------------------|--------------|
| | | Range | Population | Habitat | Future prospects | Overall | | | |
| ES | MED | | | | | | 1.75 - 1.75 area | - | 1 |
| PT | MED | | | | | | 1 - (1) loc. | - | 2 |

Data quality is based on as assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at
