

Species name: **Pinguicula nevadensis**  
 Annex: **II, IV**

Species group: **Plants**  
 Regions: **MED**

### Assessments of conservation status at the European level (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	MED						0.03 area	

MED: Endemic to the Sierra Nevada, Spain Little information reported by Spain and assessed as 'unknown' Better information required Habitat is peat bog and marshy grassland, covered in snow for much of the year. Such habitats have been assessed as unfavourable or unknown but not favourable in this region See

## Assessments of conservation status as reported by Member states (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
ES	MED						0.03 - 0.03 area	N/A	1

Data quality is based on an assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at
