

Species name: **Pulsatilla patens**
Annex: **II, IV**

Species group: **Plants**
Regions: **ALP BOR CON PAN**

Assessments of conservation status at the European level (all biogeographical regions - EU25)

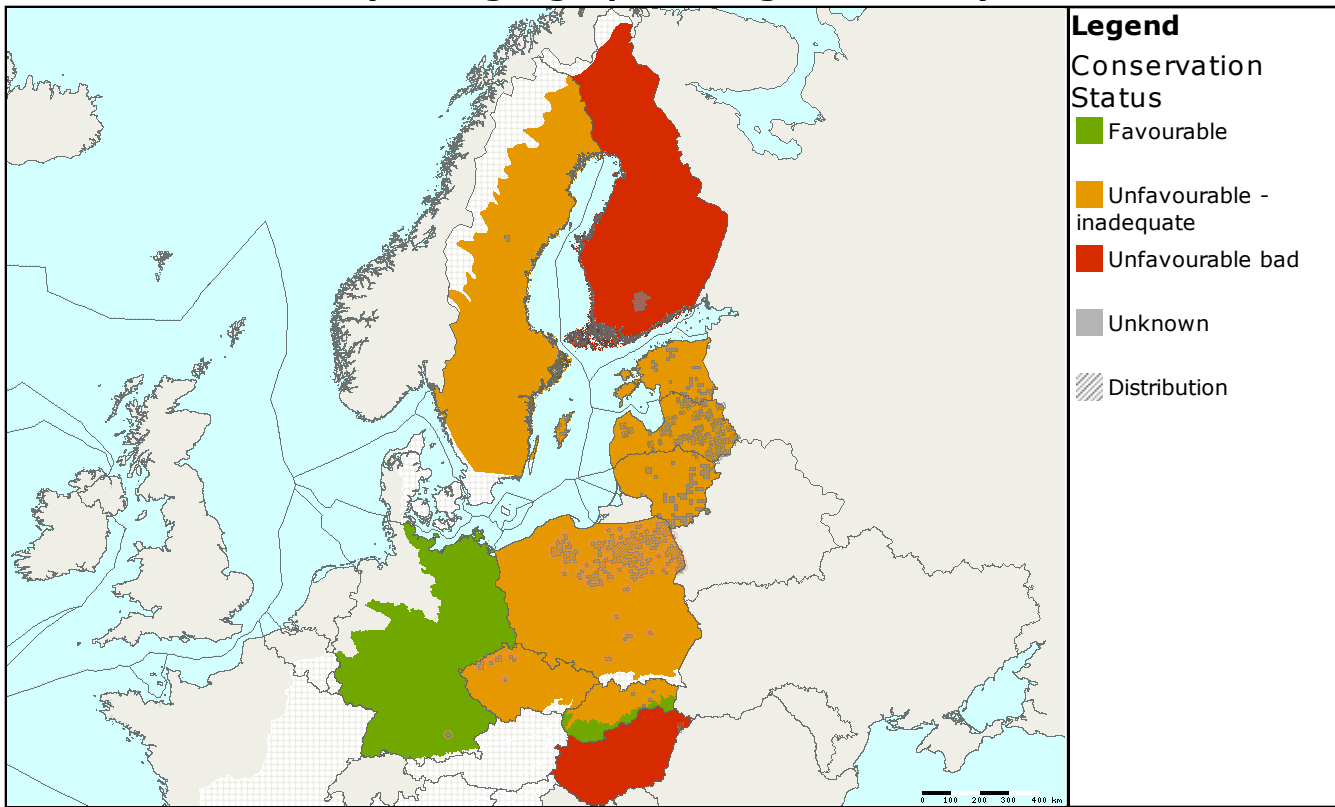

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	ALP	Orange	Grey	Orange	Grey	Orange	9 loc.	X
EU25	BOR	Green	Orange	Orange	Orange	Orange	374 grids	-
EU25	CON	Orange	Orange	Orange	Orange	Orange	266 grids	
EU25	PAN	Red	Red	Orange	Red	Red	8 grids	-

Pasque flower (*Pulsatilla patens*) is a plant distributed mainly in the Baltic area. It is most widespread in Latvia and Lithuania. Major threats are: general forestry management, dispersed habitation, roads, motorways, eutrophication, invasion by a species etc.

In Alpine, Boreal and Continental region due to prevailing 'unfavourable-inadequate' values overall assessment is the same. For Alpine region reported only by Slovakia. In Boreal region, in Latvia, its habitat quality is decreasing due to various impacts. Major impact for Continental region has Polish report. Negative overall assessment for Pannonian region ('unfavourable-bad') is derived from Hungarian report. Slovakian report is positive in all components but has minor impact.

Population is weak in both countries - only one locality reported in Slovakia, only 3 individuals in Hungary.

Assessments of conservation status as reported by Member states (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality	
		Range	Population	Habitat	Future prospects	Overall				
SK	ALP						9 - 9 loc.	X	2	
EE	BOR						56000 - 57000 tufts	=	1	
FI	BOR	FI has provided a report to the European Commission under Article 17								
LT	BOR						96 - 100 loc.	=	1	
LV	BOR						100 - 200 loc.	=	2	
SE	BOR						400000 - 400000 indiv.	=	1	
CZ	CON						3200 - 3200 tufts	X	1	
DE	CON						1 - (1) loc.	=	1	
PL	CON						500 - 1450 loc.	-	1	
HU	PAN						3 - 3 indiv.	-	1	
SK	PAN						1 - 1 loc.	=	2	

Data quality is based on an assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at <http://biodiversity.eionet.europa.eu/article17>
