

Species name: **Saxifraga valdensis**  
Annex: **IV**

Species group: **Plants**  
Regions: **ALP**

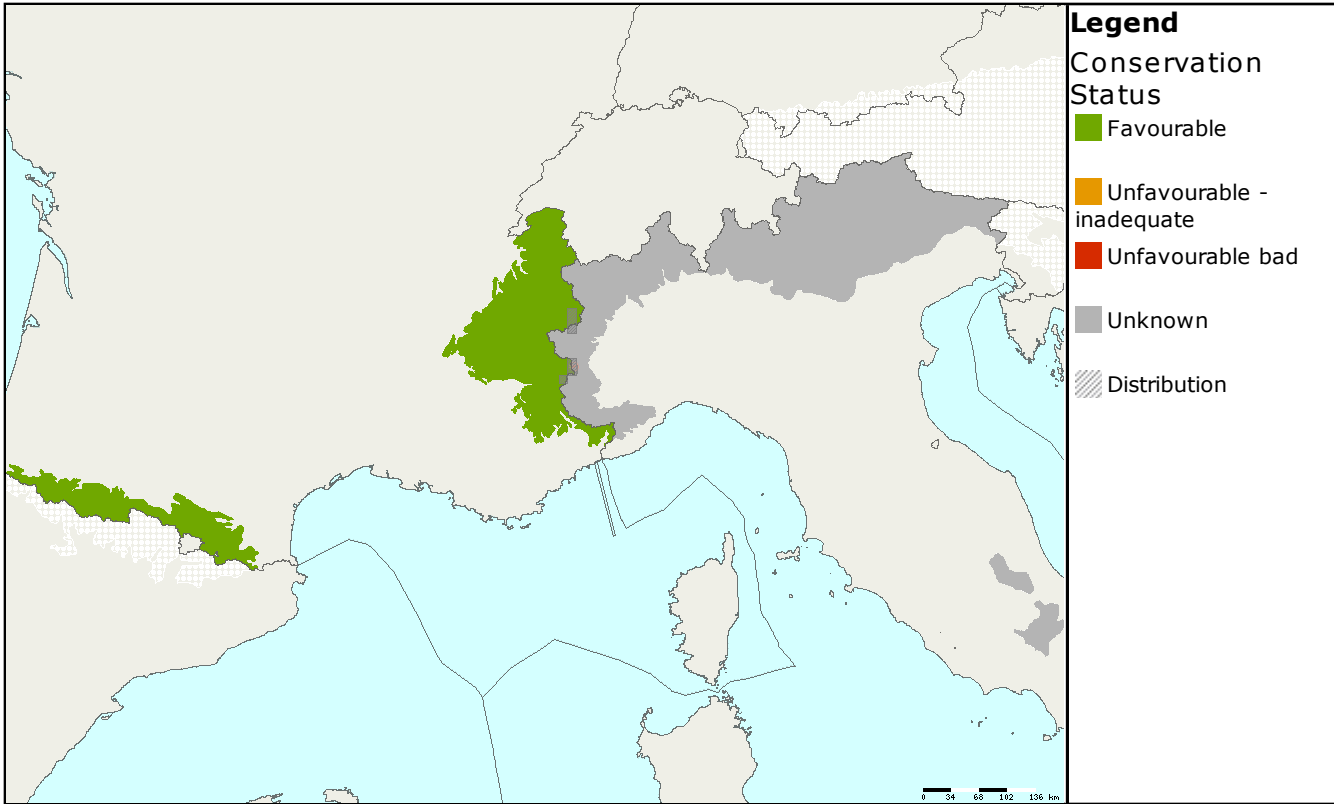

## Assessments of conservation status at the European level (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	ALP						7 grids	

*Saxifraga valdensis* is a plant that occurs in the Alpine regions of France and Italy. In France the species is widespread and its overall assessment is "favourable". In Italy only one locality is reported and all parameters are "unknown".

**Assessments of conservation status as reported by Member states  
(all biogeographical regions - EU25)**

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
FR	ALP						28 - 28 x	+	1
IT	ALP						1 - 1 loc.	X	2

Data quality is based on as assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at
