

Species name: **Sideritis discolor**
Annex: **II*, IV**

Species group: **Plants**
Regions: **MAC**

Assessments of conservation status at the European level (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	MAC	Unfavourable - inadequate	Unfavourable - inadequate	Unknown	Unfavourable bad	Unfavourable - inadequate	104 indiv.	=

MAC: Endemic to Gran Canaria, Spain Considerable discrepancies in conclusions. According to component assessments, the overall assessment should be U2. Nevertheless, in this case, the U1 value can be accepted, because the Future prospect value seem to be assessed incorrectly. Subject of a LIFE project 1998-200 'critically endangered' in Spanish RDB See http://www.mma.es/portal/secciones/biodiversidad/inventarios/inb/flora_vascular/pdf/737.pdf

**Assessments of conservation status as reported by Member states
(all biogeographical regions - EU25)**

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
ES	MAC	Unfavourable - inadequate	Unfavourable - inadequate	Unknown	Unfavourable bad	Unfavourable - inadequate	104 - 104 indiv.	=	1

Data quality is based on an assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at <http://biodiversity.eionet.europa.eu/article17>
