

Species name: **Solanum lidii**  
Annex: **II\*, IV**

Species group: **Plants**  
Regions: **MAC**

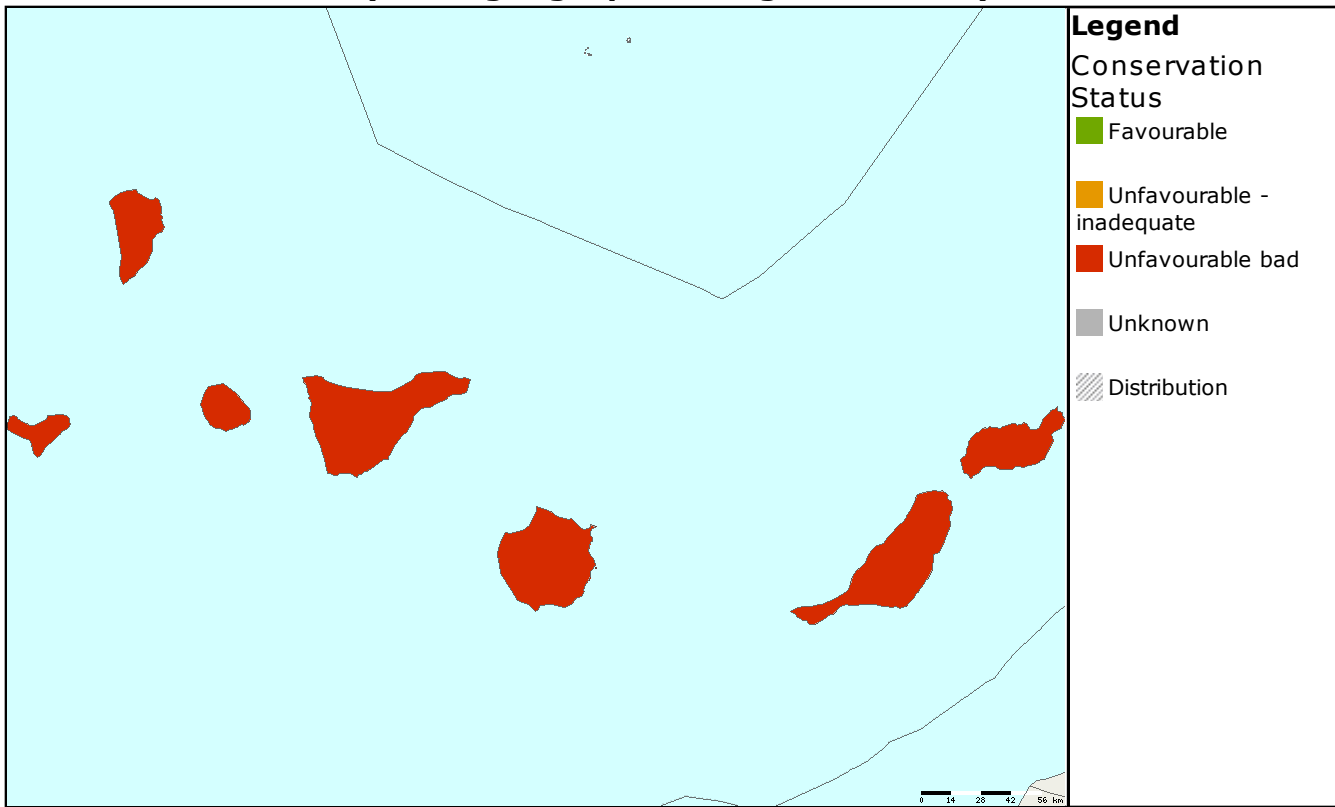

## Assessments of conservation status at the European level (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	MAC						93 indiv.	=

MAC: Endemic to Gran Canaria, Spain Unfavourable-bad due to small and fragmented population but data provided by Spain is not always consistent with it's assessments Habitat is rocky matorral, and grazing is noted as a problem in some areas Better information required but action needed if the species is to survive 'Critically endangered' in the Spanish RDB See [http://www.mma.es/portal/secciones/biodiversidad/inventarios/inb/flora\\_vascular/pdf/1212.pdf](http://www.mma.es/portal/secciones/biodiversidad/inventarios/inb/flora_vascular/pdf/1212.pdf)

## Assessments of conservation status as reported by Member states (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
ES	MAC						93 - 93 indiv.	=	1

Data quality is based on an assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at <http://biodiversity.eionet.europa.eu/article17>
