## IMPORTANT NOTE

This QA/QC report is provided for information only. No additional delivery is required from the Member State. The reporting envelope is now closed and you are not able to upload any files.

However, National Data Coordinators are invited to use the Article 17 Consultation Tool to review the national data. The review process allows you to draw attention to new information or to significant errors in the Article 17 report. In doing so, the EU biogeographical assessments will be more accurate.

Please consult the background paper and user manual available at [http://circa.europa.eu/Public/irc/env/monnat/library?l=/habitats\\_reporting/reporting\\_2001-2007/internet\\_consultation&vm=detailed&sb=Title](http://circa.europa.eu/Public/irc/env/monnat/library?l=/habitats_reporting/reporting_2001-2007/internet_consultation&vm=detailed&sb=Title) to see how you can correct possible errors using the web tool (<http://biodiversity.eionet.europa.eu/article17>)

## GENERAL REPORT - Data not compliant with QA/QC procedures

### 2. State of designation of Natura 2000

#### *Issue 20*

- 1 . A value of zero was given as to the number of SACs and area of SACs. This will be interpreted that no (0) SACs have been designated to date.

### 3.1 Management tools - Art. 6(1) - Management plans and Management bodies

#### *Issue 31*

- 1 . Zero values were given for the number of sites with comprehensive management plan, number of sites with comprehensive management plan in preparation and number of sites for which management bodies have been established. No sites were listed in the respective categories.

It will be interpreted that no management plans exist or are in preparation and that no management bodies have been established.

### 3.3 Management tools - Art. 6(1) - Non-territorial planning instruments

#### *Issue 33*

- 1 . The value indicating the number of sites (6) is not equal to the number of sites listed in the table (27). The titles of some of the instruments noted in this section (designation of the sites as Special Area of Conservation 'Candidate Site of International Importance and Nature Reserve) seem to refer to the territorial planning. This type of instruments should be included in the section 3.2 'Other territorial planning instruments'. In the section 3.3 non-planning instruments, e.g. management agreements and other contractual measures should be listed.

### 4. Conservation measures - Art. 6(1) - and evaluation of their impact on the conservation status - Art. 17(1)

#### *Issue 40*

- 1 . In this section the general description of site related conservation measures under Article 6(1) was expected. General measures of species conservation and environmental protection were provided as an answer. The relationship of the measures to the provisions under Article 6(1) of the Directive is not clear.

### 6. Measures taken in relation to approval of plans and projects - Art. 6(3,4)

#### *Issue 60*

- 1 . A value of zero was given for the number of projects for which compensation measures were necessary and Commission opinion was requested. No sites were listed in the relevant categories. It will be interpreted that compensation measures were not necessary and that there was no case where Commission opinion was requested.

## **SPECIES REPORTING - QA/QC indicates incoherence between spatial and non-spatial data or with other data officially submitted**

### **2.4.7 Species population trend period**

*Issue 10050 The end of population trend period differs by two years or more from date (or end of period) of population determination. Population and its trend are most probably not connected, as being estimated from different datasets. This makes the sub-conclusion doubtful*
