IMPORTANT NOTE

This QA/QC report is provided for information only. No additional delivery is required from the Member State. The reporting envelope is now closed and you are not able to upload any files.

However, National Data Coordinators are invited to use the Article 17 Consultation Tool to review the national data. The review process allows you to draw attention to new information or to significant errors in the Article 17 report. In doing so, the EU biogeographical assessments will be more accurate.

Please consult the background paper and user manual available at http://circa.europa.eu/Public/irc/env/monnat/library?l=/habitats_reporting/reporting_2001-2007/internet_consultation&vm=detailed&sb=Title to see how you can correct possible errors using the web tool (<http://biodiversity.eionet.europa.eu/article17>)

GENERAL ISSUES -

General issues related to the report

The spatial data from Slovakia was reported in three different grid systems, 369 files in the ETRS LAEA 5210 1x1km grid system, 1 file in the ETRS LAEA 5210 10x10km grid system both of which were re-projected to the SJTSK Krovak East North projection and 450 files in the native Slovak grid system (GCS Pulkovo 1942) in SJTSK Krovak East North projection. All the 1x1km grids were converted to 10x10km ETRS grids. The presence of different grid systems resulted in additional processing time for the report and created added complexity to the data analysis process.

GENERAL REPORT - Data not compliant with QA/QC procedures

3.1 Management tools - Art. 6(1) - Management plans and Management bodies

Issue 31

- 1 . Zero values were given for number of sites with comprehensive management plan, number of sites with comprehensive management plan in preparation and number of sites for which management bodies have been established. No sites were listed in the respective categories. It will be interpreted that no management plans exist or are in preparation and that no management bodies have been established.

3.2 Management tools - Art. 6(1) - Other territorial planning instruments

Issue 32

- 1 . A value of zero was given for the number of sites with other territorial planning instruments applied. No sites were listed under the respective title. This will be interpreted that territorial planning instruments were not applied.

6. Measures taken in relation to approval of plans and projects - Art. 6(3,4)

Issue 60

- 1 . A value of zero was given for the number of projects for which compensation measures were necessary and Commission opinion was requested. No sites were listed in the relevant categories. It will be interpreted that

compensation measures were not necessary and that there was no case where Commission opinion was requested.
