Dear Eionet user,

The Expert Meeting on the Environmental Effects of floods on 28-29 May can be attended by invited participants only.

However, to keep the process as transparent as possible, we share without password the invitation, draft agenda and a background document.

After the meeting, presentations and minutes will be uploaded here as well.

The outcomes of the meeting will be used for an EEA report on the environmental impacts of floods and floods measures. The draft report will go into Eionet consultation before being published, as normal.

In case of questions, please contact Wouter Vanneuille (Wouter.vanneuille@eea.europa.eu).

Best regards,

Wouter
