

REQUIREMENTS OF INFORMATION TO IMPLEMENT EUROWATERNET

The implementation of Eurowaternet-Quantity requires the following information:

1. **Precipitation data:** a file containing all the rain gauge stations in the country and for each station:
 - ID for each one (number and/or name to identify the station).
 - Longitude , Latitude and Altitude.
 - Mean annual precipitation for the last ten years.
2. **Data on discharges for the internal resources and actual outflow assessment:** a file containing all the gauging stations in the country and for each station:
 - ID for each one (number and/or name to identify the station, and/or the name of the stream where the station is located).
 - Longitude and Latitude of the stations.
 - Surface area of the gauge station catchment
 - Mean annual discharge for the last ten years.
