# WISE6: Determinands by group

Determinand group	Number of determinands
Biology	6
Hazardous substances – other	563
Hazardous substances – Pesticides	259
Nutrients	27
Supportive determinands	9

# WISE6: Data reported for monitoring year 2021

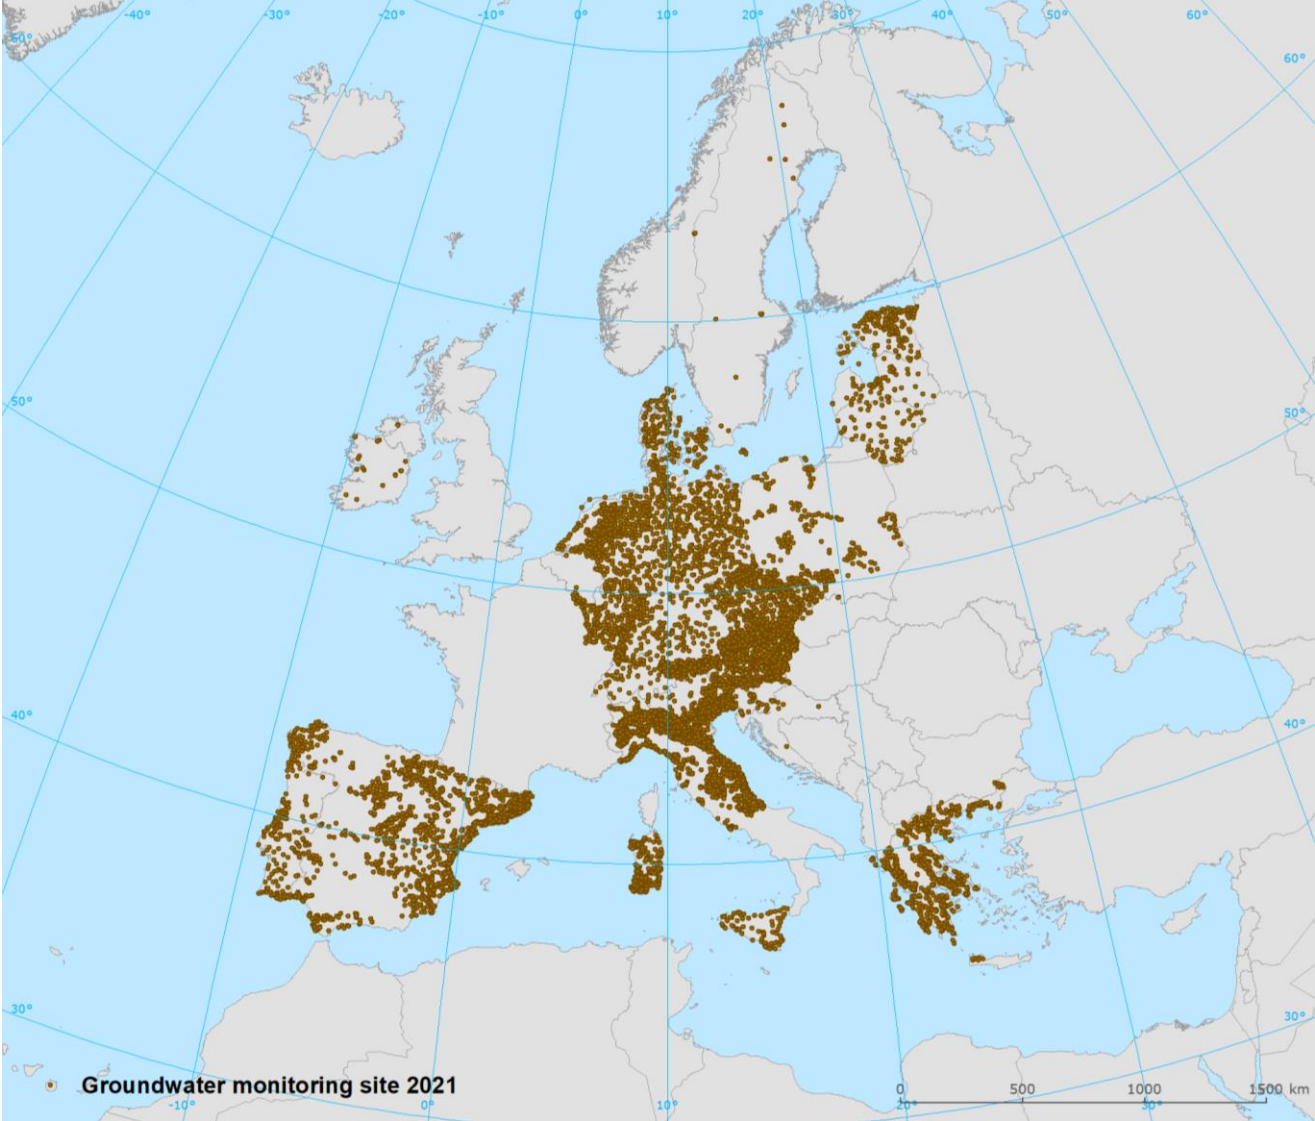

Waterbody category	Monitoring sites		Determinands		Countries	
	Number	% of the previous monitoring year (2020)	Number	% of the previous monitoring year (2020)	Number	% of the previous monitoring year (2020)
Groundwater	14526	97%	764	105%	21	84%
River water	10928	105%	733	106%	31	94%
Lake water	1717	101%	669	106%	24	92%
Coastal water	590	85%	446	99%	8	73%
Transitional water	342	90%	475	95%	11	92%
Territorial water	1	50%	3	2%	1	50%

# WISE6:Data reported for monitoring year 2021

14 526 groundwater monitoring sites reported.

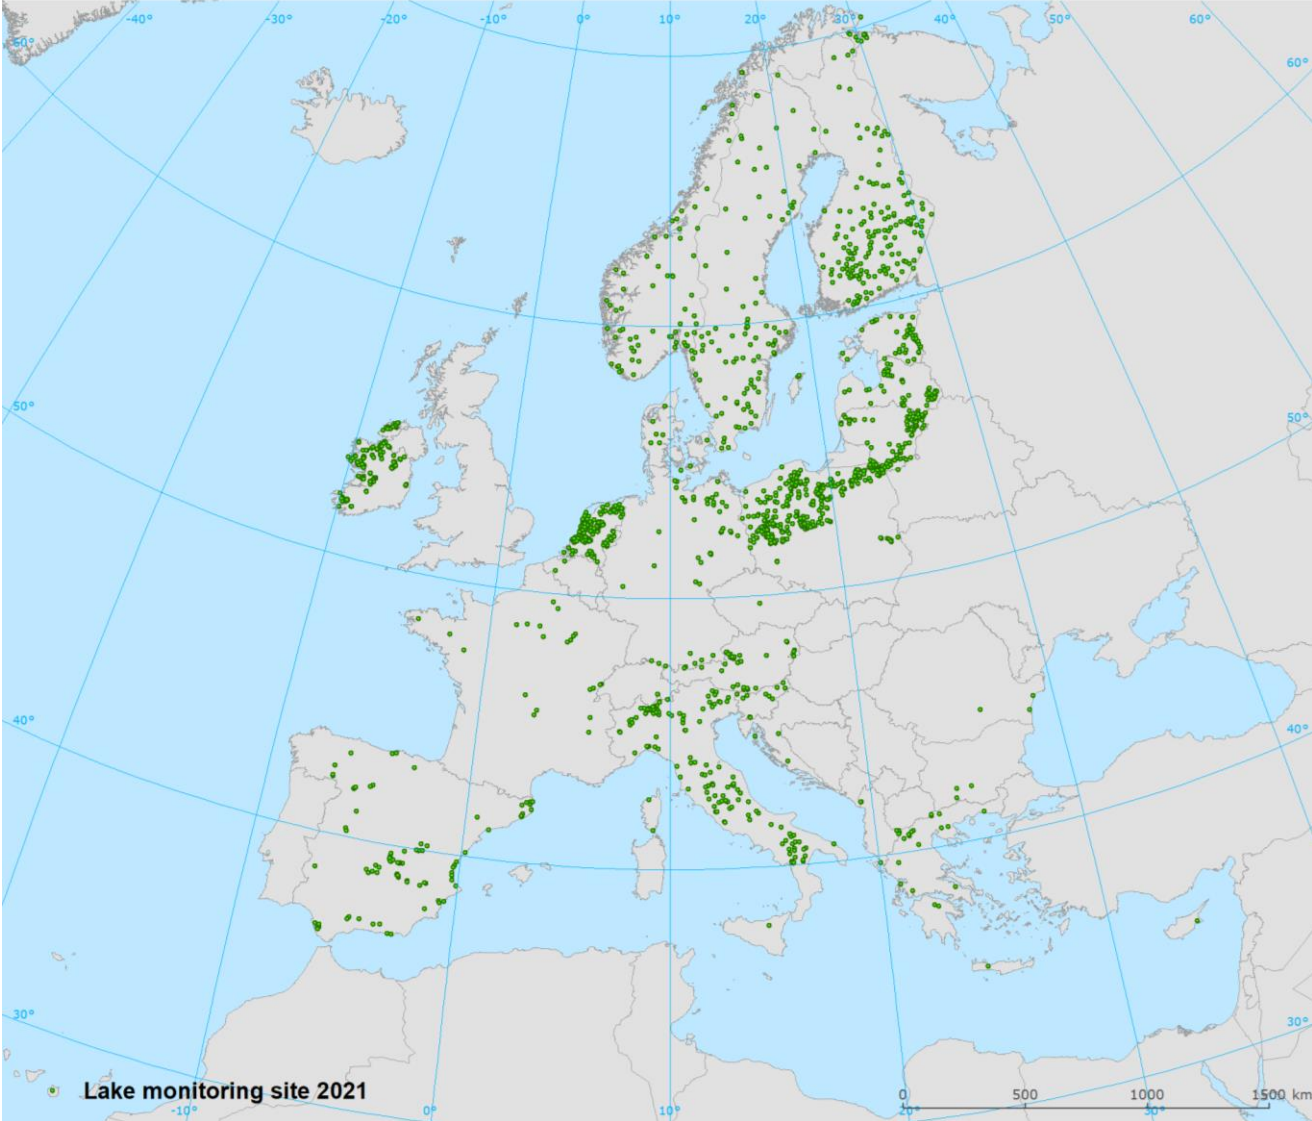

# WISE6: Data reported for monitoring year 2021

10 928 river monitoring sites reported.

# WISE6: Data reported for monitoring year 2021

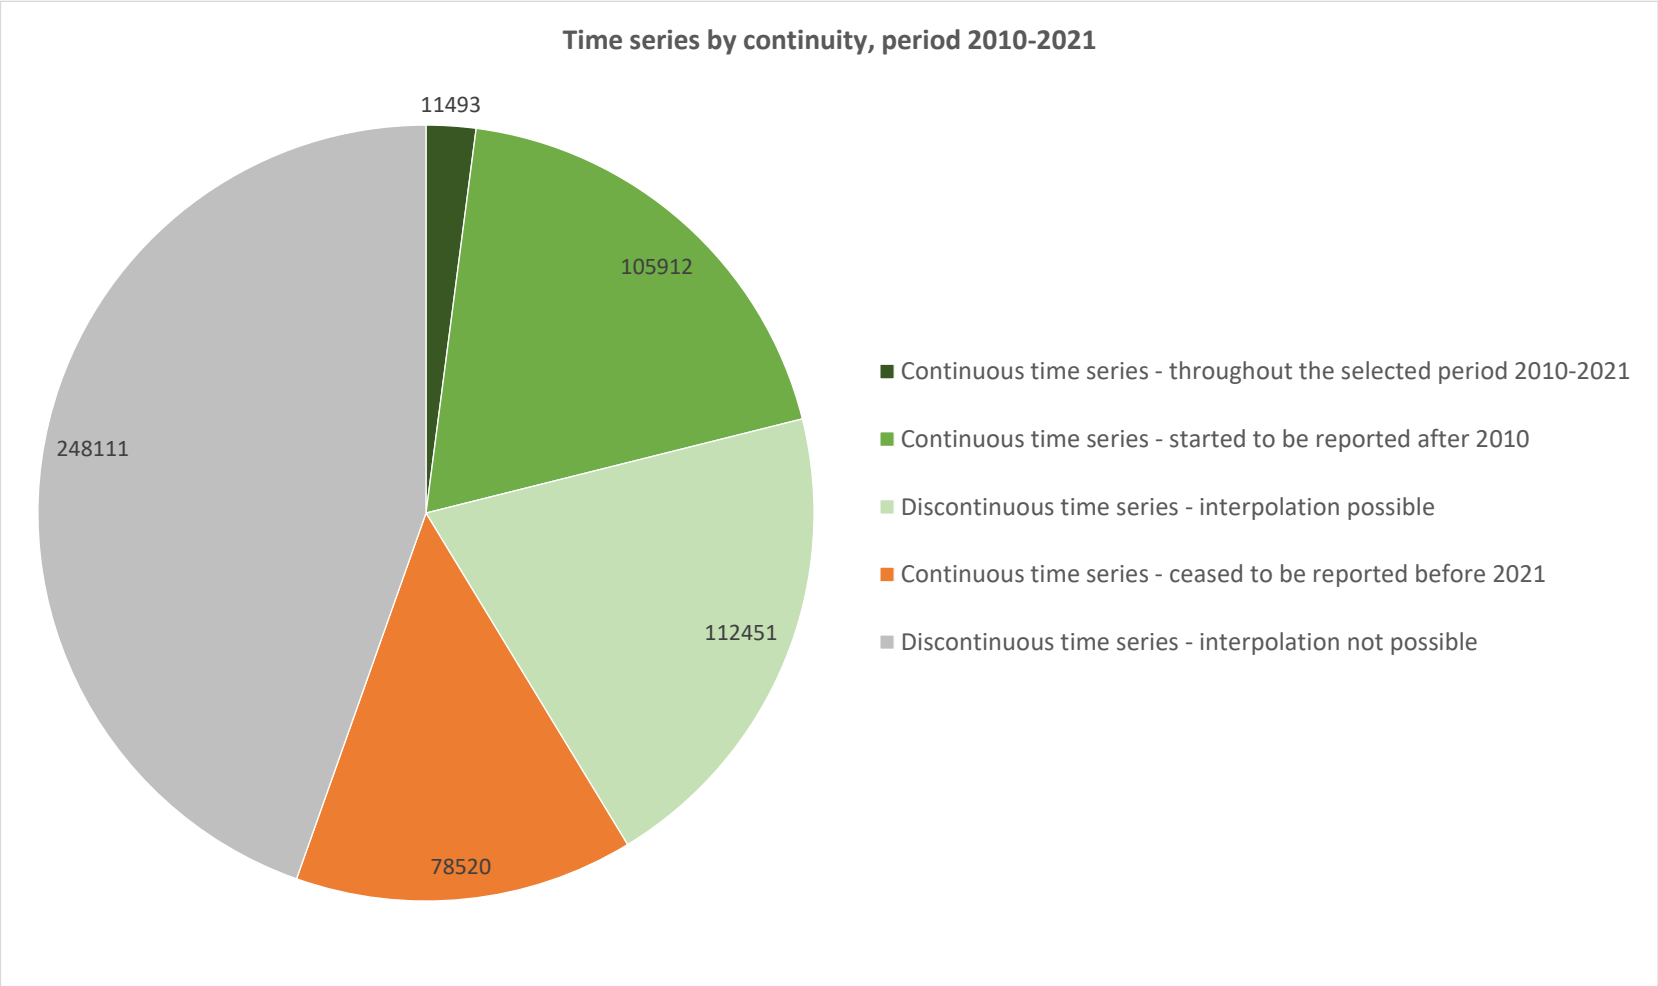

1717 lake monitoring sites reported.

# WISE6: Time series

54 983 monitoring sites reported any of the 15 most reported determinands, for any year since 2010. **Only 48% of these reported any of these data for 2021.**

570 791 time series can be composed of these data. **Less than half are directly used for the trend analysis.**

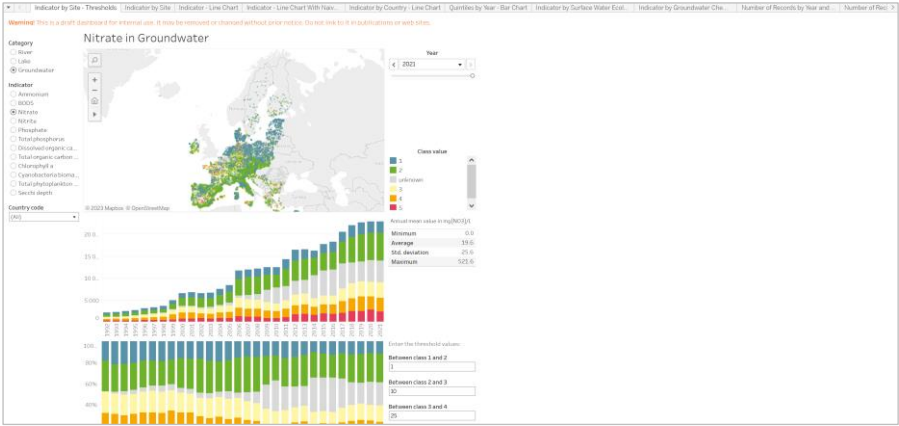

Source: [Waterbase Water Quality ICM, 2022](#) | Note: Time series assessment based on 15 most reported determinands; time series means a set of annual data points for a monitoring site, for a determinand.
