

Introduction to reporting WISE-6 for new reporters

WISE SoE – Biology data (WISE-6 data flow)

WISE-6 data flow includes water quality data in groundwater, rivers, lakes, transitional, coastal and marine waters. Includes data on nutrients, organic matter, chlorophyll-a, hazardous substances and general physico-chemical parameters in water, sediment and biota.

Define reporting and find resources

Reporting help

It describes how to use Reportnet during the reporting process and how to improve the quality of deliveries.

https://cdr.eionet.europa.eu/help/WISE_SoE/wise6

Data dictionary (DD)

Central service for storing technical specifications of the data requested in reporting obligations (e.g. data types, allowable value, relationships between other element...)

https://dd.eionet.europa.eu/datasets/latest/WISE-SoE_WaterQualityICM

Reporting Obligations Database (ROD)

Enables storing, searching, browsing and updating reporting obligations. Within ROD, user can find all information about WISE SoE data flows.

<https://rod.eionet.europa.eu/obligations/14>

Define reporting and find resources

Fulfil the reporting template, which can be downloaded from [Data Dictionary](#):

	A	B	C	D	E	F	G	H	I	J

	9										
	10										

Define reporting and find resources

1. Grant your reporting rights

Help section: WISE6 > [Water Quality data reporters](#)

2. Get step-by-step guidance to deliver the data

Help section: WISE2 > [WISE SoE Reportnet guidance](#)

3. Enter the CDR, create envelope, and upload the file

[CDR for official deliveries](#) | [CDR Sandbox](#) (user/password: datareporter/datareporter)

4. Run automatic QC

Issue levels: Information, Warning, Error, Blocker

5. Release the envelope
