

TERM Report 2019: topic options

28 September 2018

Looking back

2018 Electric vehicles from life cycle and circular economy perspectives

2017 Aviation and shipping — impacts on Europe's environment

2016 Transitions towards a more sustainable mobility system

2015 Evaluating 15 years of transport and environmental policy integration

Looking further back

2014 Focusing on environmental pressures from long-distance transport

2013 A closer look at urban transport

2012 The contribution of transport to air quality

2011 Laying the foundations for greener transport

Looking even further back

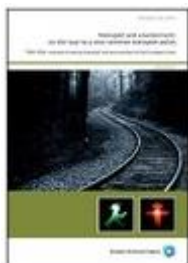

2009 Towards a resource-efficient transport system

2008 Transport at a crossroads

2007 Climate for a transport change

2006 Transport and environment: on the way to a new common transport policy

What do we see?

Focus on:

- Transport modes (2017)
- Technology (2018)
- Parts of the system (i.e. urban, long-distance) (2014, 2013)
- Mobility system dynamics (2016, 2009)
- Impacts like climate change or air quality (2012, 2007)
- Policy (2015, 2006)

What comes next?

- What are key transport topics for 2019?
- How do they sit within the tradition of the TERM report?
- Where can the report add most value / provide visibility?

Some ideas

- Transport and landscape fragmentation
- Local air quality in the context of urban mobility
- Impact of e-commerce on transport and environment
- Revisit past topics (i.e. 5 years on / 10 years on)
- Special focus on active modes (walking and cycling)
- Urban mobility from a transitions angle
- Automated, intelligent and connected: transport technology trends and the environment

What do you think?

???
